

# General

## How can I verify that I'm on the current ColossusXT chain?

In the debug console, type `getblockcount`. This will tell you the newest block in your wallet. Then type `getblockhash` followed by that block number.

```
09:50:52  getblockcount
09:50:52  497291
09:51:00  getblockhash 497291
09:51:00  145c2eae930a29d1e7c751277ee2f9b07110e75971dcc57ca65521ef9cffe156
```

Now visit the [COLX Blockchain Explorer](#) and search for that same block number. The blockhash displayed should match the hash from your console:

## ColossusXT Blockchain Explorer

up to block 497292

Get a hardware wallet and secure your cryptos !

## Details for Block #497291

Hash [145c2eae930a29d1e7c751277ee2f9b07110e75971dcc57ca65521ef9cffe156](#)

Date/Time 2018-09-14 16:51:27 extracted by [Proof of Stake](#)

If it matches, you are good to go.

If it does not match, the best way to resolve this is by following the [ColossusXT In-Wallet Bootstrap Guide](#).
