General

Wallet icon appears on task bar, but window won't open up fully.

Try below in order and move on to the next step if your issue is not solved:

1) Right-click the task bar and click "Cascade Windows". Check if you can see the wallet.

2) **On Windows:**

- Exit wallet
- Run "regedit" (Press "Windows" and "R" keys together, it will open a run window, write "regedit" there and click "OK")
- Delete this reg key: HKEY_CURRENT_USER\Software\ColossusXT\ColossusXT-Qt\nRPCConsoleWindowPos
- Restart the wallet and the window position should be fixed.

On Mac:

- Exit wallet
- Open Terminal
- cd ~\Library\Preferences
- rm io.http\:\ \ colossusXT.ColossusXT-Qt.plist
- Restart the wallet and the window position should be fixed.
