

General

Error: Spend Zerocoin failed to find coin set amongst held coins with less than maxNumber of Sends

Issue

The following error is encountered:

You may also see an error that says "In rare cases a spend with 7 coins exceeds our max allowable transaction size, please retry spend using 6 or less coins."

Explanation

This error is a result of a transaction limit built into zCOLX.

zCOLX uses an advanced RSA-2048 zero-knowledge proof handshake to confirm zCOLX ownership before allowing a transaction. Because these verifications are extremely computationally intensive, a limit of 6 zCOLX spends per transaction has been put in place. If your transaction uses more than 6 zCOLX, you will need to break the transaction into smaller amounts before proceeding.

Instructions

From the Privacy tab, click the zCOLX Control button:

Spend ZeroCoin failed with status = 7
Message: Failed to find coin set amongst held coins with less than maxNumber of Spends

zCOLX Control zCOLX Selected: 0 Quantity Selected: 0

Spend ZeroCoin Available Balance: 1200 zCOLX Security Level: 42

Pay To:

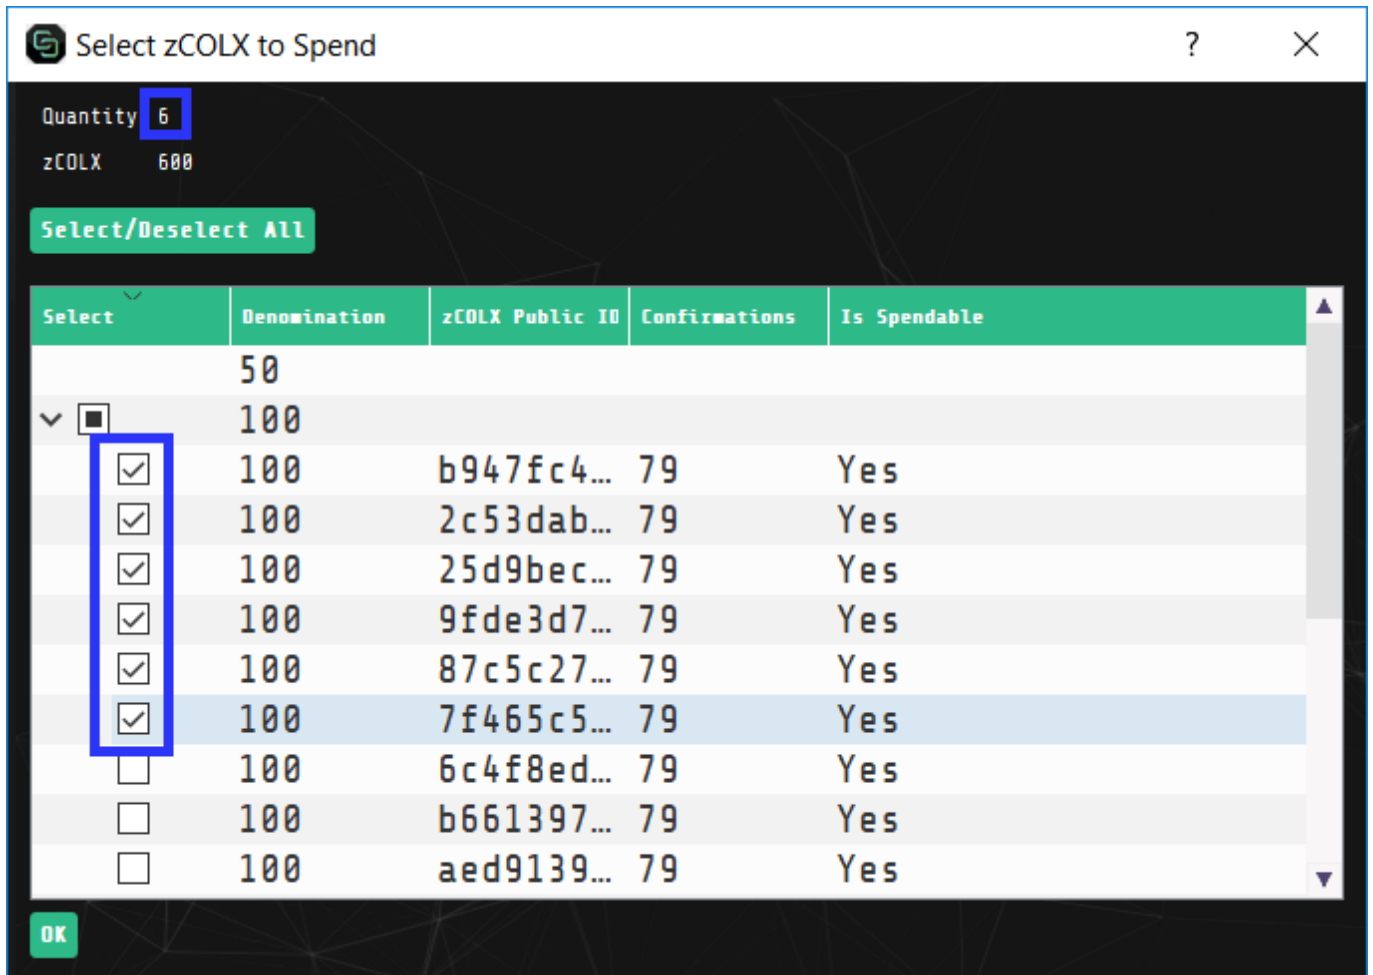

Label:

Amount: zCOLX

Convert Change to ZeroCoin (might cost additional fees) Minimize Change

Your zCOLX will be listed by denomination. Expand all nodes and select up to 6 zCOLX, then click the OK button.

General

Enter an address if needed. A **BLANK** address will create a payment to yourself, converting your zCOLX back to COLX.

Include a label if you wish to add the entered address to your address book.

Enter a zCOLX amount less than or equal to the displayed amount labeled "zCOLX Selected".

Click "Spend Zerocoin", and review and accept the confirmation screens as needed.

General

The screenshot shows a transaction interface for zCOLX. At the top left, there is a green button labeled "zCOLX Control". To its right, the text "zCOLX Selected: 600" is displayed, with "600" enclosed in a blue box. Further right, "Quantity Selected: 6" is shown. Below this, another green button labeled "Spend Zerocoin" is visible. To its right, the text "Available Balance: 1200 zCOLX" is shown. Further right, a "Security Level" is set to "42", with a small up/down arrow icon. Below these elements are three input fields: "Pay To:" (with a person icon and a pencil icon to its right), "Label:", and "Amount:". The "Amount:" field contains the value "600", which is also enclosed in a blue box. A large blue arrow points upwards from the left side of the "Amount:" field towards the "Spend Zerocoin" button. At the bottom of the interface, there are two checkboxes: "Convert Change to Zerocoin (might cost additional fees)" and "Minimize Change", both of which are currently unchecked. The unit "zCOLX" is displayed at the bottom right of the "Amount:" field.
